

Design for all Senses

PRODUCT PORTFOLIO

OLIVERKESSLER

“Welcome to the latest portfolio of Oliver Kessler Design, showcasing unique relaxing objects that blend nature’s versatility with state-of-the-art technology. Manufactured in small series for those who are interested in individual and functional design with an exquisite touch, but without comprising a broad market acceptance.

Maintaining a high quality and excellent service is the reason for the success of the products of Oliver Kessler Design. These products can be found in high end resorts worldwide and even in Arabian Royal Palaces.

This portfolio introduces the elegant Vincerò lamp. The concept of this ambiance and reading lamp was created on one of my many voyages to the Middle East. Like our signature product, the luxury ceiling fan The Solitaire Punkah, Vincerò is a product that you will not find in the design store, but only at selected agents worldwide or directly at Oliver Kessler Design in Munich, Germany.

Now, sit back, relax and indulge in the unique portfolio of Design for all Senses!”

With creative regards,
Oliver Kessler, January 2012

THE SOLITAIRE PUNKAH

Icon of Luxury and Taste

The punkah is the initial man-made ventilation device. It was originally cut from a palmyra leaf and later manufactured mainly from fabric, wood or bird's feathers. For generations the punkah was a symbol of wealth and luxury and could be found in oriental high places such as palaces of Egyptian Pharaohs and Indian Maharadjahs.

THE SOLITAIRE Punkah brings back the majestic punkah fan with its slow pendular movement. It instantly creates an almost tangible relaxing and calming atmosphere and it is the exquisite complement of an exclusive interior design.

THE SOLITAIRE Punkah is based on a unique technology that combines a counterweight balanced mechanism with a computer controlled electric motor. This allows the punkah to swing in an almost soundless and highly energy efficient pendular style.

THE SOLITAIRE Punkah comprises two components: THE DRIVER and THE BLADE. You have the choice of different driver versions and expressive blade designs to meet any residential and commercial project demands. Bespoke driver finishes and customized blades, uniquely designed for a special location, are of course also available.

THE SOLITAIRE PUNKAH

Icon of Luxury and Taste

THE DRIVER

- Driver case precision milled from a solid block of aluminium
- Installation bracket solid powdercoated stainless steel
- All stainless steel parts 410 or 457 quality
- All aluminium parts chemically treated and powder coated for maximum corrosion protection
- Sealed case for maximum protection of electronic components
- Digital motor controller
- Super silent high torque motor
- Automatic safety stop
- Auto adjust power supply (110 / 230 VAC)
- Appr. 10-15W average power consumption (depending on size of blade and speed)

Icon of Luxury and Taste

OPTIONS

- Bespoke colour of powder coating
- Interface for home automation system
- 2.4 GHz remote control with USB recharge system
- SynchTool to synchronize an unlimited number of THE SOLITAIRE Punkah fans
- LED blade illumination

THE SOLITAIRE PUNKAH

Icon of Luxury and Taste

THE BLADES

The Peacock

- Powdercoated aluminium, carbon fibre, brass, peacock feathers
- max. 2200 x 1400 x 120 mm, 15 kg

The Ostrich

- Powdercoated aluminium, stainless steel, 72 Swarovski® crystals, 24 ostrich feathers
- 1400 x 800 x 120 mm, 10 kg

The Breezer

- Powdercoated aluminium, fireproof fabric, different colours available
- Large: 1800 x 1000 x 120 mm, 15 kg
(Small: 1800 x 730 x 120 mm, 10 kg)

VINCERÒ

The elegant lines of Vincero ("I shall win") are inspired by sports trophies and draw a reference to one of the tallest buildings in Qatar, the Aspire Tower.

The solid transparent body is partly coated by a semi-transparent lacquer which is illuminated by four powerful warm white LEDs.

The focused beam of a fifth LED in the base's center points upwards through the transparent body onto the lower surface of a polished badge on the top.

This badge works as a mirror and turns the 350mm high Vincero into both a spot light and an ambient lamp.

Both light characters can be switched independently.

Design: Oliver Kessler

RAIN³

Rethink indoor fountains.

RAIN³ lets you indulge in the atmosphere of a refreshing summer rain shower.

Without getting wet.

Material: Plexiglass

Colour: Different choices available

Size: Scalable from 400 x 400 x 400 mm

Illumination: LED, different choices of colour available

Water runs inside and along illuminated Plexiglass tubes

Design: Oliver Kessler

ORIGAMILIGHT

Origamilight is a kaleidoscopic lighting object based on threedimensional geometric shapes.

The integrated light sources illuminate the handcrafted tiles of Japanese paper evenly.

Origamilight is manufactured according to client's wishes, as Gasho (picture), Zataku (table) or Hekkimen (wall panel).

Design: Oliver Kessler & Andrea Janek

UP TOWN

Reflecting the skyline of modern metropolises.

Edgy, clean and cool by day, warm and eye-catching by night.

Uptown is scalable from a 60 cm high table lamp size up to a 1.50+ m large floor lamp.

The shade is made from frosted glass or Plexiglass, the base can be manufactured according to client's wishes.
